# TANKS

Backed with Schaefer's reputation for high quality stainless steel products in nearly all industries and applications, Schaefer Tanks are the perfect solution for your business. Our stock tanks are designed for flexibility of use in a variety of applications and customizable from our factories in Europe to meet your exact needs.

## Special Features

Jacketed or  
Non-Jacketed

Easy to Clean

Stackable

Forklift Channels for  
Easy Mobility

Like our KEGs, all of our tanks are manufactured using high grade stainless steel. We stock 500L, 800L and 1000L in both jacketed and non-jacketed aseptic tanks with a standard configuration which can be used effectively in most North American breweries, wineries and distilleries. The jacketed version is perfect for any application which requires temperature control, while the non-jacketed option is lighter weight and more cost effective for those applications which are not temperature sensitive. Our tanks feature the Tri-Connect Total Drain System which makes both transfer of product and cleaning as easy as possible. Whether using for storage, fermenting, transportation or even tasting, Schaefer Tanks are one of the most versatile tools available.

## Stainless Tank Technical Data

Size/Volume	Height (inches)	Diameter (inches)	Weight (lbs.)	Configuration
1000L	77.75	39.37	430	Tri-Connect Total Drain System with Top Hatch
800L	68.62	39.37	320	
500L	52.64	39.37	265	

\*weight subject to change due to style and configuration

## Uses

Product Storage

Ingredient Storage

Fermentation and Aging

Transportation
